Education

Ontario Tech University Oshawa, ON

Bachelor of Information Technology (Honours) - Networking and IT Security *Sept. 2024 - Expected Apr. 2028*

- Coursework: Computer Security, Cryptography, Cloud Computing, Advanced Networking.

Experience

Co-Founder and Platform Developer May 2026 - Present

SSIK IT Consulting & Solutions - Student-Led Initiative *Ontario, Canada*

- Co-founded a two-person IT and cybersecurity initiative; define **service scopes**, privacy research, and evidence-based review methods for potential authorized engagements.
- Built an internal review platform that links findings to evidence and tracks review status; implemented **role-based access**, outbound-request safeguards, **audit logging**, and verified backup and restore.

Head of Internal Technical Operations Jan. 2026 - Present

Arch Narrative - Developing Nonprofit *Oshawa, ON*

- Build and manage internal systems for a nonprofit with **280 volunteers**, **116 students**, and **66 active mentor-student pairs** (Oct. 2026 organizational snapshot).
- Centralized account requests and support tickets using **Google Forms/Sheets** and Drive-linked evidence; administer **Google Workspace** departmental inboxes and document ownership and handoff procedures.

Projects

OTNow Canvas Companion | *JavaScript, Chrome MV3, Firefox WebExtensions, Canvas APIs*

- Independently built and published a Canvas deadline companion on the **Chrome Web Store** and **Firefox Add-ons**, with moved-date detection, local reminders, and offline caching.
- Limited Canvas access to **2 allowlisted read-only endpoints**; kept coursework local and made aggregate reporting strictly opt-in.
- Opt-in snapshot (Nov. 4, 2026): **1,351 organized Canvas items** from **15 consenting reporting installations**.

Cisco Networking Labs | *Cisco IOS, Packet Tracer, Wireshark*

- Designed and verified multi-device routed and switched topologies using **IPv4/IPv6**, **VLANs**, **802.1Q** trunks, inter-VLAN routing, DHCP, STP, NAT, and OSPF/EIGRP fundamentals.
- Isolated connectivity and routing faults with **Cisco IOS** operational state, routing tables, ping, traceroute, and **Wireshark** captures; revalidated reachability after each correction.

File Integrity Monitor | *Python, SHA-256, JSON, unittest*

- Built a **SHA-256** baseline monitor with a local review dashboard and CLI sharing one deterministic engine for added, modified, deleted, and moved files.
- Detected **45/45 controlled changes** across **500 fixture files** with zero scan errors; exported deterministic JSON evidence for repeatable review.

Secure File Transfer | *Python, TLS, SHA-256, FastAPI*

- Built an authenticated **TLS** file-transfer client/server and a loopback-only **FastAPI** workspace for account setup, recipient inboxes, and verified downloads.
- Implemented recipient-scoped storage, resumable uploads, two-sided **SHA-256 verification**, tamper quarantine, throttling, and audit logging.
- Completed **1,000 verified uploads and 1,000 verified downloads** across 1,000 unique files with **16 concurrent workers** in a controlled benchmark; every file passed SHA-256 verification.

Technical Skills

Networking: IPv4/IPv6, subnetting, VLANs, 802.1Q, inter-VLAN routing, DHCP, DNS, NAT, STP, OSPF/EIGRP fundamentals, routing and switching troubleshooting
Security: TLS, SHA-256, file-integrity monitoring, access control, audit logging, input validation, threat modelling
Languages: Python, JavaScript, TypeScript, HTML/CSS
Systems: Linux, Windows Server, Cisco IOS
Tools/Platforms: Google Workspace Admin, Wireshark, Packet Tracer, Git/GitHub, WebExtensions, Canvas API
